SECTION 4. FIRST AID MEASURES

General advice	Move non-essential personnel away from treatment area, spill, or dangerous area. Have this safety data sheet available for emergency/medical responders.
If inhaled	Remove victim from area of exposure - avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. For all but the most minor symptoms arrange for patient to be seen by a doctor as soon as possible, either on site or at the nearest hospital.
In case of skin contact	Take off contaminated clothing and shoes immediately. Wash the skin immediately with plenty of water for at least 15 minutes. Immediate medical treatment is necessary as untreated wounds from corrosion of the skin heal slowly and with difficulty. Wash clothing before reuse.
In case of eye contact	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention immediately. Continue to rinse during transport. Protect unharmed eye. Small amounts splashed into eyes can cause irreversible tissue damage and blindness.
If swallowed	Rinse mouth thoroughly with water and then drink plenty of water. Never give anything by mouth to an unconscious person. Take victim immediately to hospital. Do NOT induce vomiting as this may cause chemical burns in mouth and throat. Contact the Poison's Information Centre (Australia 131 126; New Zealand 0800 764 766).
Protection of first aiders	If potential for exposure exists refer to Section 8 for specific personal protective equipment.
Notes to physician	Treat Symptomatically.
Most important symptoms and effects, both acute and delayed	See Section 11 for more detailed information on health effects and symptoms.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.
Unsuitable extinguishing media	Not known
Specific hazards during firefighting	Not flammable or combustible. May produce toxic fumes, for example, carbon monoxide if burning.
Hazardous combustion products	Decomposition products may include the following materials: Carbon oxides Sulfur oxides
Special protective equipment for firefighters	Firefighters are to wear self-contained breathing apparatus if in risk of exposure to fumes or products of combustion.

Specific extinguishing methods

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. In the event of fire and/or explosion do not breathe fumes. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit, they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in Sections 7 and 8.

Environmental precautions

Do not allow contact with soil. Prevent runoff to waterways, drains, stormwater or sewer.

Methods and materials for containment and cleaning up

Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material e.g., sand, earth, diatomaceous earth, vermiculite, and place in container for disposal according to local / national regulations (see Section 13). Flush away traces with water. For large spills (>5L), dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

**Biological occupational exposure limits
Engineering measures**

None allocated.

Effective exhaust ventilation system. Maintain air concentrations below occupational exposure standards.

Personal protective equipment

Respiratory protection

Avoid breathing mists or sprays. Where ventilation is poor or exposure limit may be exceeded, wear a full-face respirator with inorganic acid mist/vapour cartridge.

Hand protection

Wear rubber gloves or other acid resistant gloves if contact with skin is expected. Recommended gloves include:

Laminated film
Neoprene rubber
Butyl rubber

Gloves must be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection

Wear chemical goggles and face shield.

Skin protection

Wear protective clothing and chemical resistant footwear.

Hygiene measures

Handle in accordance with good industrial hygiene and safety practices. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling. Provide suitable wash facilities for quick drenching or flushing of the eyes and body in case of contact or splash hazard.

Product AT RECOMMENDED USE DILUTION

Engineering measures

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Eye protection

Safety glasses with side-shields

Hand protection

Rubber gloves e.g. neoprene or butyl rubber. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Skin protection

Protective clothing and footwear.
