D-Limonene	5989-27-5	95 - 100

SECTION 4. FIRST AID MEASURES

If inhaled	Remove victim from exposure if safe to do so. If rapid recovery does not occur, transport to nearest medical facility for additional treatment. Remove contaminated clothing.
In case of skin contact	If skin contact occurs, remove contaminated clothing and wash skin thoroughly with water and follow by washing with soap if available.
In case of eye contact	If in eyes, hold eyes open, flood with water for at least 15 minutes. If symptoms persist transport to nearest medical facility for additional treatment.
If swallowed	If swallowed, do NOT induce vomiting. Transport to nearest medical facility for additional treatment. If vomiting occurs spontaneously, keep head below hips to prevent aspiration.
Most important symptoms and effects, both acute and delayed	Inhalation: May cause irritation to the respiratory system, headaches and coughing.
both acute and delayed	Skin: May include redness, itching, possible dermatitis. May cause sensitisation by skin contact.

SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing media	:	For a small fire use dry chemicals, carbon dioxide, water spray or foam. For large fires use water spray, fog or foam.
Unsuitable extinguishing media	:	High volume water jet
Specific hazards arising from chemical	:	Carbon monoxide may be evolved if incomplete combustion occurs. Will float and can be reignited on surface water. Vapour is heavier than air, can spread along ground and distant ignition is possible. Use water spray to cool fully closed containers.
Special protective equipment : for firefighters	:	Wear full protective clothing and self-contained breathing apparatus. Hazchem code 3Y.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	Avoid contact with spilled or released material. Shut off leaks, if possible, without personal risks. Isolate hazard area and deny entry to unnecessary or unprotected personnel. Remove all sources of ignition in the surrounding area. Take precautionary measure against static discharge. Ensure electrical continuity by bonding and earthing all equipment.
Environmental precautions	Use appropriate containment to avoid environmental contamination. Prevent from spreading and entering waterway using sand, earth or other appropriate barriers. Attempt to disperse the vapour or to direct its flow to a safe location for example by using fog sprays. Ventilate contaminated area thoroughly.
Methods and materials for containment and cleaning up	For small spills (< 1 drum), transfer by mechanical means to a labelled, sealable container for product recovery or safe disposal. Allow any residues to evaporate or use an appropriate absorbent material and dispose of safely. For larger spills (> 1 drum), transfer by means such as a vacuum truck to a salvage tank for recovery or disposal. Do not flush residues with water. Retain as contaminated waste. Allow any residues to evaporate or use an appropriate absorbent material and dispose of safely.

SECTION 7. HANDLING AND STORAGE

Advice on safe handling Conditions for	Avoid contact with skin, eyes and clothing. Wash thoroughly after handling. Do not eat, drink or smoke in contaminated areas. Handle and open containers with care in a well- ventilated area. Store in a cool, well-ventilated area. Do not store near strong oxidants.
safe storage	
Materials to avoid	Strong oxidizing agents

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure control measures

No exposure standard has been established by Safe Work Australia.

Biological occupational exposure limits

No biological limits have been established by Safe Work Australia.

Engineering measures :	Ensure that adequate ventilation is provided. Avoid generating and inhaling mists and vapours. Keep containers closed when
	not in use.

Personal protective equipment

Respiratory protection	If work practices do not maintain airborne level below the exposure standard, use appropriate respiratory protection equipment. When using respirators, select an appropriate combination of mask and filter. Select a filter for organic gases and vapours (boiling point > 65°C). Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.
Hand protection	: Use solvent resistant gloves, nitrile for longer term protection or PVC and neoprene for incidental splashes
Eye protection	Wear safety goggles.
Skin and body protection	 Impervious clothing Choose body protection according to the amount and concentration of the dangerous substance at the workplace.
Hygiene measures	When using do not eat or drink. When using do not smoke. Wash hands before breaks and at the end of workday.
