SECTION 4. FIRST AID MEASURES

General advice Move non-essential personnel away from treatment area, spill, or dangerous area.
Have this safety data sheet available for emergency/medical responders.

If inhaled Remove to fresh air. Treat symptomatically. Get medical attention if symptoms occur.

In case of skin contact Wash off immediately with plenty of water for at least 20 minutes. Remove contaminated clothing and shoes. If skin is burned, cover burn with a loose sterile gauze dressing. Take victim to hospital or a medical centre as soon as possible. Wash contaminated clothing before re-use.

In case of eye contact Small amounts splashed into eyes can cause irreversible tissue damage and blindness. Rinse immediately with plenty of water, also under the eyelids, for at least 20 minutes.

Continue rinsing eyes during transport to hospital. Remove contact lenses.

Protect unharmed eye. Keep eye wide open while rinsing.

After treatment, if symptoms persist, get immediate medical advice.

If swallowed Rinse mouth with water.

If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Rinse mouth with water again.

Immediately call a Poison Centre or doctor. Treatment is urgently required. Transport to a hospital.

Do **NOT** induce vomiting unless directed to do so by a doctor or Poison Centre. Never give anything by mouth to an unconscious person.

If potential for exposure exists refer to Section 8 for specific personal protective equipment.

Treat symptomatically as for strong alkaline substance. Symptoms may be delayed.

Effects are immediate and delayed.

Symptoms may include blistering, irritation, burns, and pain. Effects are dependent on exposure (dose, concentration, contact time).

SECTION 5. FIREFIGHTING MEASURES**Suitable extinguishing media**

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards during firefighting

Not flammable or combustible. May produce toxic fumes, for example, carbon monoxide if burning.

Hazardous combustion products

Decomposition products may include the following materials: Carbon oxides

Sulfur oxides

Special protective equipment for firefighters

Firefighters are to wear self-contained breathing apparatus if in risk of exposure to fumes or products of combustion.

Specific extinguishing methods

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. In the event of fire and/or explosion do not breathe fumes. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

SECTION 6. ACCIDENTAL RELEASE MEASURES**Personal precautions, protective equipment and emergency procedures**

Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit, they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in Sections 7 and 8.

Environmental precautions

Do not allow contact with soil. Prevent runoff to waterways, drains, stormwater or sewer.

Methods and materials for containment and cleaning up

Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material e.g., sand, earth, diatomaceous earth, vermiculite, and place in container for disposal according to local / national regulations (see Section 13). Flush away traces with water. For large spills (>5L), dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

SECTION 7. HANDLING AND STORAGE**Advice on safe handling**

When diluting, always add the product slowly to the water. Never add the water directly to the product as violent spattering can occur. Do not breathe vapours or mists.

Avoid contact with skin and eyes. For personal protection see Section 8.

Smoking, eating and drinking should be prohibited in the application area.

Dispose of rinse water in accordance with local and national regulations.

Conditions for safe storage

Do not store near acids. Keep container tightly closed in a dry and well-ventilated place.

Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Do not store in aluminium or galvanised containers nor use die-cast zinc or aluminium bungs; plastic bungs should be used.

Electrical installations / working materials must comply with the technological safety standards.

Storage temperature

5 - 40 °C
